

Vuong Ta Cuong

Software Engineer

Be a logical, process-focused person with a pragmatic approach to problem-solving and motivated to get things done, even in stressful environments. With nearly 3 years of experience in programming on many technologies with different projects. In addition, I am an inquisitive person, like to take on challenges, and really care about implementing and designing large systems. In the long term, I want to try new situations and increase my skills and experience.
